

NEWS FROM THE FOUNDATION

A 501c3 charitable organization

Congratulations to our recent awardees!

Alexis Mallory, NPHS, "3D Printing in Technology"

3D printers and scanners will allow engineering students to realize prototypes from start to finish. Students will deepen their understanding of the iterative design process by designing objects, printing them, testing their functionality, and making adjustments where needed.

Sarah Sebald, Lenape, "Feed Your Mind"

Students from lower socio-economic backgrounds will receive a bag of books at the appropriate reading levels to maintain proficiency during the summer months and ideally foster a love of reading in the future.

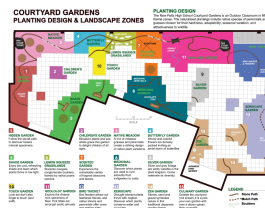

Mary Holmes, NPMS, "Middle School Drama Club"

Bluetooth Audio Systems will aid rehearsal and performance of the annual musical. Green screens purchased for the "World Languages Classroom Movie Studio" project in 2015 helped Mary Poppins to "fly".

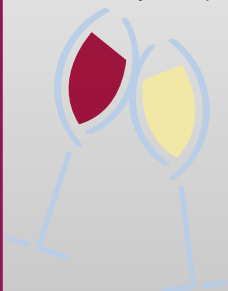

Cathy Law, NPHS, "Courtyard Gardens Phase 6"

Phase 6 will include the addition of native perennials, grasses, vines, and shrubs; exotic annuals to attract insects; a model volcano; and further development of various theme gardens.

DINE & WINE
